

Please check that all items listed here are present in a package before using them.
CFast Card (1), Storage Case (1), Installation Guide (1) <This Guide>

When using your product and a CFast Card, observe the following to avoid losing valuable data:

- As accidental data loss can occur at any time, back up panel screen and CFast Card data regularly.
- Before using the CFast Card, familiarize yourself with the CFast Card's front and rear face orientation, as well as the position of the CFast Card connectors. If the CFast Card is not positioned correctly when inserted into your product, the Card's internal data and your product could become damaged.

NOTICE

LOSS OF DATA

- Insert the CFast Card properly.
- While a CFast Card is accessed, do not turn OFF or reset your product, and do not remove the CFast Card.
- Turn OFF your product when inserting or removing the CFast Card.
- Do not store the CFast Card where there is static electricity or electromagnetic waves.
- Do not store the CFast Card in direct sunlight, near a heater, or other locations where high temperatures can occur.
- Do not bend the CFast Card.
- Do not drop or strike the CFast Card against another object.
- Keep the CFast Card dry.
- Do not touch the CFast Card connectors.
- Do not disassemble or modify the CFast Card.
- Format the CFast Card with the file system required by your product.
- Do not place a label on the CFast Card.

Failure to follow these instructions can result in equipment damage.
